Art. 1000 triple programmable hose reel cart

Programmable automatic irrigation system above ground, entirely designed and patended by Agrati.
Steel made and coated with no-toxic polyester powder.
Equipped with brass made connectors.
Equipped with a strong cranks made of steel and pp coated.
Equipped with 3 independent hose reel rollers, each with its own charging channel, and an automatic programmer installed on the frame that allows to manage the 2 hoses wound on the lower rollers with timed programs. The hose wound on the upper roller is charged directly and it is not managed by the controller, to ensure a good water flow at any time.

Hose rolls not included.
